

NAME

archive_write_set_passphrase, **archive_write_set_passphrase_callback** — functions for writing encrypted archives

LIBRARY

Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

```
#include <archive.h>
```

```
int
```

```
archive_write_set_passphrase(struct archive *, const char *passphrase);
```

```
int
```

```
archive_write_set_passphrase_callback(struct archive *, void *client_data,  
archive_passphrase_callback *);
```

DESCRIPTION

archive_write_set_passphrase()

Set a passphrase for writing an encryption archive. If *passphrase* is NULL or empty, this function will do nothing and **ARCHIVE_FAILED** will be returned. Otherwise, **ARCHIVE_OK** will be returned.

archive_write_set_passphrase_callback()

Register callback function that will be invoked to get a passphrase for encryption if the passphrase was not set by the **archive_write_set_passphrase()** function.
