NAME

archive_write_set_passphrase, archive_write_set_passphrase_callback — functions for writing encrypted archives

LIBRARY

Streaming Archive Library (libarchive, -larchive)

SYNOPSIS

```
#include <archive.h>

int
archive_write_set_passphrase(struct archive *, const char *passphrase);

int
archive_write_set_passphrase_callback(struct archive *,
    void *client_data, archive_passphrase_callback *);
```

DESCRIPTION

archive_write_set_passphrase()
: Set a passphrase for writing an encrypted archive. If *passphrase* is NULL or empty, this function will do nothing and ARCHIVE_FAILED will be returned. Otherwise, ARCHIVE_OK will be returned.

archive_write_set_passphrase_callback()
: Register a callback function that will be invoked to get a passphrase for encryption if the passphrase was not set by the **archive_write_set_passphrase**() function.
